

## Calibration and Testing Services

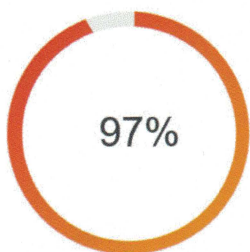

**NATEX Measurement Solutions** is an Australian-owned, multi-disciplined supplier of industrial instrumentation, calibration, configuration and repair services. We provide one of the broadest and most reliable ranges of calibration, accredited calibration and measurement technology services in Australia.

**As a full-service provider** we are the single point of contact for all our customers instrument calibration, service and repair needs. We are vendor independent and able to support all manufacturers and instrument types in both our laboratories and through our metrology network. Specialising in outsourcing of internal calibration laboratories means deep understanding in many industries and new capabilities, accreditations and capacity that benefits all our customers. You can focus on your core business, leaving all calibration and maintenance of measurement equipment to us including laboratory equipment and staff, reducing CAPEX (Capital Expenditure) and administration costs.

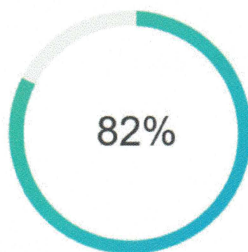

**We service** all the major brands and manufacturers, such as Keysight, Fluke, Tektronix, FLIR, Budenberg, Honeywell, Amtek, Norbar, Mitutoyo, Brüel & Kjær, Kyoritsu, Horiba, Dräger Safety, Mettler Toledo, Anritsu, Testo, Hach and so much more. We are able to support all manufacturers and instrument types.

Our people, products and process, have been the hallmarks of our trusted relationships with our clients, who have come to depend on us as their business partner of choice.

**As partners we believe that if you succeed, we will too.**

Servicing completed on-time

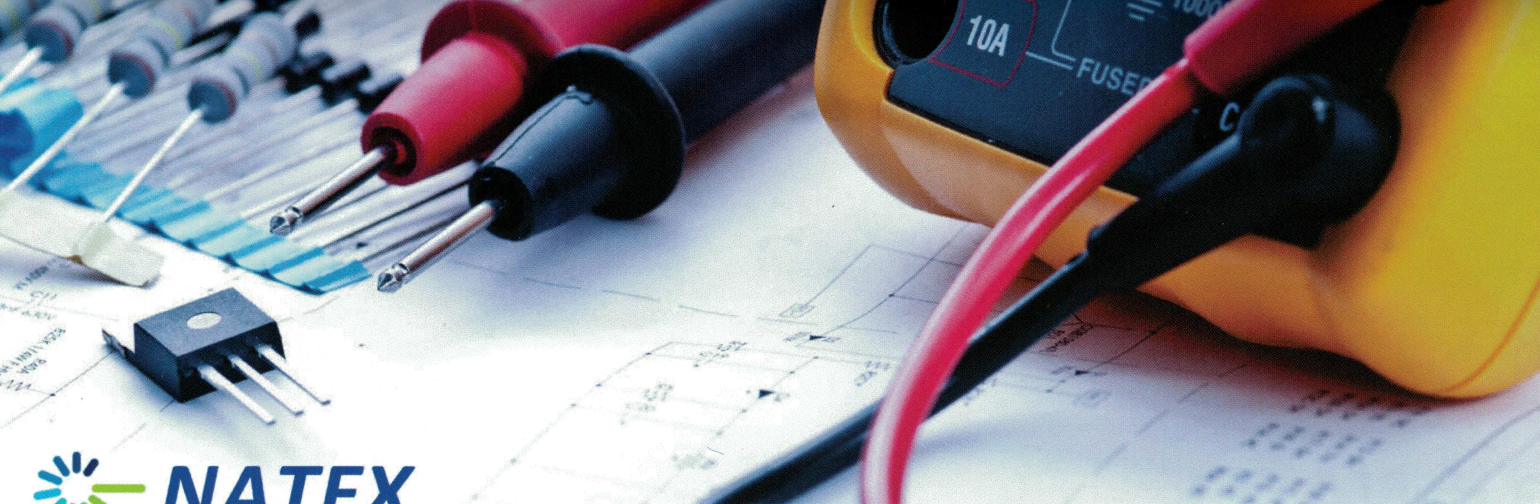

Repair jobs completed on-time

We also service and maintain the following brands:

## Unmatched Metrology Network

**With our network of over 100 partner laboratories, you can be sure we can meet your needs.**

Acting as your single point of contact we can supply, service, calibrate and repair most instruments within the following categories:

Electrical & Electronic Instrumentation	RF Measurement
Flow Equipment	Torque Equipment
Level Equipment	Dimensional & Distance
Pressure Gauges and Equipment	Gas Detection, Monitors and Sensors
Data acquisition (DAQ)	Safety Devices
Optical & Transmission Testers	Radiological Devices
LiDAR & Laser Equipment	Scientific & Analytical Equipment
Temperature and Humidity	Weighing, Loadcells and Scales
Mechanical Equipment	Insulated Electrical Safety Equipment
Environmental Instruments	Water Quality & More!
